

# Women Bowlers from Ingram Church Defeat Mount Pleasant Quint

## Ingram Bowlers Win In Big Match Game

Capitol Hill Women Duckpin Artists Defeat Picked Team from Washington Ladies' League by Seventy-four Pins in Total Count.

Before a crowd that taxed the capacity of "Chick" Gandli Arcade Alley last night, the Ingram ladies' bowling team, from Ingram Church defeated an All-Star team picked from the leading players of the Washington Ladies' Bowling League.

The fair sex duckpin stars agreed upon total pins to decide the winner, and the Ingram women handed the experts from Mount Pleasant a beating by 74 pins, totaling 1,336, while the ladies from the bowling league were gathering 1,262.

Not only did the Ingram women come through in the total count, but they also showed consistent team work by winning two of the three games. In the first they were defeated by a ten-pin margin, but they made up for their poor work in the second by spilling 49 pins, 45 pins better than their fair opponents from the bowling league.

Much credit cannot be given each individual for her efforts, but the consistent work of the Ingram team paved the way for the seventy-four-pin margin in the final total.

Miss Williams, rolling in anchor position for the Capitol Hill team, was the star, totaling 311 pins for her three games, and in the second she put across the score of 113. Her work as a whole was exceptionally good. Miss Smith was second in line for her club, dropping 23 pins for the Ingram cause, while Miss

Greenwood totaled 270, having next to the highest game of the evening, when she spilled 112 pins in the second. Miss Treck followed with 265 pins while Mrs. Shaffer was in poor form and could gather but 230, having for her best game 90 in the final.

Miss Paine, rolling last for the picked team from the league, put over the second highest total of the evening, dropping 275 pins. She also reached the century mark by spilling 109 in her first. Miss Hazen was next in line with 273 pins to her credit. She also touched the century mark, gathering 106 in the first. Mrs. Malcolm spilled 246 pins, having for her best game 90, which she landed in the opener, while Miss Graham was next in line with 241. Miss Larage rolled the poorest of the evening, gathering only 227.

The fair sex demonstrated that they could handle the bowling ball, as curves, cross-alley and straight-away deliveries were in evidence during the evening. Miss Hazen led the field with marks with six spares during the rolling, while Miss Treck followed with 265 pins, while spares and one strike. Miss Paine obtained four marks, while Miss Smith and Mrs. Malcolm hit the pins for three apiece. The score follows:

Miss Hazen led the field with marks, with six spares during the rolling, while Miss Treck followed with 355 pins, with spares and one strike. Miss Fague, Miss Greenwood and Miss Williams each obtained four marks, while Miss Smith and Mrs. Malcolm hit the pins for three apiece. The scores follow:

Ingram.		Washington H. L.	
Greenwood.....	90 112 78	Malcolm.....	90 82 77
Treck.....	112 112 112	Smith.....	77 77 77

## TROTTERING AND PACING

By L. D. SALE.

The Herald begs leave to present today a photograph of the much-admired eighteen-month-old trotting filly Normanda, purchased by N. J. Ward and E. F. Hall, of this city, at the recent November "Old Glory" sale held in New York City.

Since her arrival in a special car in the National Capital Miss Normanda has been holding forth in large public exhibitions at the horse salon of Norman Corbin, and the unanimous verdict rendered is that she is a magnificent representative of the American trotting sire, and of the Wilkes family, of which she is a member.

This added to the fact that she was foaled the property of Walnut Hill farm, the famous nursery of high-class trotters of all ages, is of itself a much-credited distinction, for with a single exception, the farm has but one formidable rival in the production of extreme speed in either continent.

Normanda is an extremely smart-made filly, with a star and strip in the face and white stockings behind. Compared with other fillies of the same age she is foaled in three parts, she is of extraordinary size, with abundance of bone. In the matter of blood lines she represents through her sire, and through the sire of her dam, the two greatest sires and daughters that have ever been bred in the United States, and in an unbroken line from George Wilkes, 2:22 for San Francisco, 2:07.4, sire of Normanda, is a son of Zombro, 2:11, who in turn is a son of McKinney, 2:11.4, he of the A. J. C. 2:27, and he by George Wilkes.

This particular Wilkes strain of blood is fortified on a solid concrete base on the maternal side, from the fact that Moko girded the dam of Normanda. The name of her dam is Normanda, and she is a half sister to Tomoko, 2:16, and Normanda, 2:19.2. The second dam of Normanda is Norpelt, 2:21.4, with a trial at four years of 2:04.4. Norpelt is a daughter of Jersey Wilkes, 2:26, of the famous Tablet (granddam of The Harvester, 2:01), who was by Cuyler, 1:58.

Back of this speed-giving superstructure we find such basic lines of speed as Freda, dam of Dexter and Indio, and of others. Normanda's fourth dam, Prefa, was by Pancoast, the best son of Woodford Mambrino. Her fifth dam was the great brood mare Chelina, by Messenger Duroc; her sixth dam, the great brood mare Hyacinth, by Volunteer; her seventh dam, the immortal Clara, dam of Dexter and Indio, by American Star, 1:40, and her eighth dam the McKinstry mare, dam of Shark, 1:57.4, whose record, when made, was considered fast time.

In breeding speed to speed for eleven generations does not produce speed of the highest order. In breeding, as in other matters, connected with daily

pay him a fancy salary, and sent him home to Coffeyville to think matters over. At that time the fans were dead sore of experience. And experience has shown that in improving the thoroughbred horse, and which has brought him to his present high estate, was the adoption of this method of breeding. In a large sense the late harness horse has progressed along the same lines.

The maternal line that nourished the greatness of The Harvester, 2:01, flows in the veins of Normanda. The sire of The Harvester is Walnut Hill, 2:08.1-4. The sire of Normanda is San Francisco, 2:07.4, and he was rated as being a two-minute trotter when purchased by Walnut Hill Farm and retired to the stud. The sire of Normanda is a full brother to Normanda, sold at the same sale for \$2,000, the top price of the sale for youngsters. What an individual pays for a horse is simply his personal appreciation of value. It does not demonstrate that the horse purchased, when developed, will prove to be better than the horse that cost less. The horse that has named is its equal in individuality and breeding. Prices paid for untitled youngsters cuts but little ice. In the final analysis, it is what the horse can do or will do that counts. "All rest is leather and prunella."

## Outwits Horse Thief.

Though starting in pursuit forty-eight hours after a horse had been stolen, a man named Hensel, of the Washington Police, succeeded in outwitting the thief and recovering the horse. The horse was stolen from a stable in the city, and the thief was seen riding it in the suburbs. Hensel followed the thief for several hours, and finally overtook him just before he reached his home. The horse was recovered, and the thief was taken into custody.

## TO PLAY WITH ALL-STARS

Hero of the Georgetown-Virginia games, who will play right half back for Mike Madden's All-Stars against the Vigilants at Andrews Park today.

## FLEISHELL LEADS HERALD BOWLERS

Lead-off Man of Agate Team Tops Printers' Duckpin Circuit with 96.11

SWITZER IS SECOND HIGH

Anchor Man of Breviers Has Hit the Maples for 94.3 Average.

Anderson Next.

George Fleishell, the lead-off man for the Agates team of the Washington Herald Duckpin League, leads the field of pin-spillers by dropping the maple for an average of 96.11, for twenty-four games.

Fleishell also leads the league with the high individual game, having spilled the pins for a 125 mark. His work has proven to be the most consistent of any of the players in the league. His highest set for the season is 125.

Fred Switzer, rolling in anchor position for the league-leading Breviers, is next in line with a mark of 94.3 for the same amount of games. His high game is 113, with the set of 204.

Capt. Anderson, of the Breviers, stands in third position with a mark of 93.1, while Stewart Lynch is trailing with 92.7. Capt. Beck, of the Nonpareils, with 91.4 is next in line, while Bussius came through with 91.1.

The highest individual set to date was rolled by Gill, of the Picas, who topped 200 pins. The highest team game for the season is held by the Agates, who dropped 40 pins, while the same club holds high team total for three games with a mark of 1,687 pins. The averages are as follows:

Player	G.	St.	Sp.	W.	L.	Pct.
Fleishell	24	1	1	1	0	1.00
Switzer	23	2	1	1	0	.83

pay him a fancy salary, and sent him home to Coffeyville to think matters over.

At that time the fans were dead sore of experience. And experience has shown that in improving the thoroughbred horse, and which has brought him to his present high estate, was the adoption of this method of breeding. In a large sense the late harness horse has progressed along the same lines.

The maternal line that nourished the greatness of The Harvester, 2:01, flows in the veins of Normanda. The sire of The Harvester is Walnut Hill, 2:08.1-4. The sire of Normanda is San Francisco, 2:07.4, and he was rated as being a two-minute trotter when purchased by Walnut Hill Farm and retired to the stud. The sire of Normanda is a full brother to Normanda, sold at the same sale for \$2,000, the top price of the sale for youngsters. What an individual pays for a horse is simply his personal appreciation of value. It does not demonstrate that the horse purchased, when developed, will prove to be better than the horse that cost less. The horse that has named is its equal in individuality and breeding. Prices paid for untitled youngsters cuts but little ice. In the final analysis, it is what the horse can do or will do that counts. "All rest is leather and prunella."

Normanda is an extremely smart-made filly, with a star and strip in the face and white stockings behind. Compared with other fillies of the same age she is foaled in three parts, she is of extraordinary size, with abundance of bone. In the matter of blood lines she represents through her sire, and through the sire of her dam, the two greatest sires and daughters that have ever been bred in the United States, and in an unbroken line from George Wilkes, 2:22 for San Francisco, 2:07.4, sire of Normanda, is a son of Zombro, 2:11, who in turn is a son of McKinney, 2:11.4, he of the A. J. C. 2:27, and he by George Wilkes.

This particular Wilkes strain of blood is fortified on a solid concrete base on the maternal side, from the fact that Moko girded the dam of Normanda. The name of her dam is Normanda, and she is a half sister to Tomoko, 2:16, and Normanda, 2:19.2. The second dam of Normanda is Norpelt, 2:21.4, with a trial at four years of 2:04.4. Norpelt is a daughter of Jersey Wilkes, 2:26, of the famous Tablet (granddam of The Harvester, 2:01), who was by Cuyler, 1:58.

Back of this speed-giving superstructure we find such basic lines of speed as Freda, dam of Dexter and Indio, and of others. Normanda's fourth dam, Prefa, was by Pancoast, the best son of Woodford Mambrino. Her fifth dam was the great brood mare Chelina, by Messenger Duroc; her sixth dam, the great brood mare Hyacinth, by Volunteer; her seventh dam, the immortal Clara, dam of Dexter and Indio, by American Star, 1:40, and her eighth dam the McKinstry mare, dam of Shark, 1:57.4, whose record, when made, was considered fast time.

In breeding speed to speed for eleven generations does not produce speed of the highest order. In breeding, as in other matters, connected with daily

life, mankind has but one lamp, the lamp of experience. And experience has shown that in improving the thoroughbred horse, and which has brought him to his present high estate, was the adoption of this method of breeding. In a large sense the late harness horse has progressed along the same lines.

The maternal line that nourished the greatness of The Harvester, 2:01, flows in the veins of Normanda. The sire of The Harvester is Walnut Hill, 2:08.1-4.
